

Five most important questions for project report of Group 7

My name: Joel Christiansen

- Q1
 - How is the requirement that apps that collect personally identifiable information include a privacy policy enforced? As in, how is it determined that A) an app collects the information and B) the app includes a policy.
 - PG# 13; line # 8
- Q2
 - With google having recently announced the first SHA-1 collision, how likely is it that frequently used services are vulnerable to an attack of this type?
 - PG# 23; Fig 7.
- Q3
 - Do you believe Facebook takes as good care of your user data as it should? If not, what is the best way to deal with this?
 - PG# 27; line # 4 -
 - PG# 32; line # 2
- Q4
 - Who do you believe has the best privacy policy?
 - PG# 27; line # 4 -
 - PG# 46; line # 5 -
- Q5
 - Do you believe the benefits inherent to apps such as Facebook or Snapchat are worth the risks to personally identifiable information being leaked in hacks or sold to various agencies.
 - Overall
